# HEREFORD RURAL DISTRICT

*Medical Officer of Health :*

**R. Wood-Power, B.A., F.R.C.S. (Ire.), D.P.H.,**  
**Public Health Department,**  
**1 Ledbury Road,**  
**Hereford.**

17th May, 1973.

*To the Chairman and Members of the Hereford Rural District Council.*

LADIES AND GENTLEMEN,

I beg to lay before you the Annual Report for the above District for the year 1972.

The birth-rate was 14.8 per 1,000, and the death-rate was 12.8 per 1,000 (and when adjusted by the comparability factors supplied by the Registrar General, were respectively 16.4 and 9.5 per 1,000), and the infant mortality rate 22.0 per 1,000 births.

The report of the Chief Public Health Inspector is appended hereto.

I am, Ladies and Gentlemen,

Yours faithfully,

R. WOOD-POWER.

## **PUBLIC HEALTH STAFF**

*Medical Officer of Health—*

R. WOOD-POWER, B.A., M.B., B.Ch., F.R.C.S.(Ire.), D.P.H.  
(Part-time).

*Chief Public Health Inspector—*

DONALD FODEN, F.R.S.H., M.A.P.H.I., Cert.S.I.B.,  
Cert. Insp. Meat and Other Foods.

*Additional Public Health Inspector—*

S. D. COCHRANE, M.A.P.H.I., M.R.S.H., Dip. P.H.I.E.B.

*Clerk/Typist—*

Mrs. F. R. Massey.

---

*Clerk of the Council—*

E. N. SHELDON, F.I.M.T.A., F.R.V.A.

## GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA

### Professional Nursing in the Home

There is an adequate number of District Nurses/Midwives in the Area to cover all Parishes.

Their services are provided by the County Council and the Nurses are under the supervision of the Chief Nursing Officer.

### Laboratory Facilities

Bacteriological examinations are made by the Public Health Laboratory Service at the County Hospital, Hereford, where Dr. D. R. Christie is in charge.

The chemical analyses of water and other samples are carried out by Messrs. G. Rudd Thompson and Partners Ltd., Newport, Mon., and by the County Analyst, Worcester.

### Hospitals

Hospital Services for the County of Hereford are under the Management of the Herefordshire Hospital Management Committee, who are responsible for the control of all Hospitals, to which patients can be admitted in case of need.

### Ambulance Facilities

Ambulance facilities are available through the Herefordshire County Council Ambulance Service, whose services may be obtained through County Ambulance H.Q., Grafton, Hereford (telephone 4451). The service is available to all registered medical practitioners and in certain cases to registered midwives. Attendance at accidents and sudden street illnesses can be obtained by the public by following the instructions given on the dial of the telephone.

Stretcher ambulances and sitting case vehicles are available at any time and are manned by trained personnel.

The H.Q. Station is supplemented by Sub-stations distributed throughout the County.

### Clinics and Treatment Centres

Tuberculosis	...	...	...	County Hospital.
Venereal Diseases	...	...	...	County Hospital.
Orthopaedic	...	...	...	General Hospital

### Physical Features and General Character

The Rural District of Hereford is situate in the middle of the county, and completely surrounds the city of Hereford.

In the north Dinmore Hill rises to a height of 747 ft., in the south Orcop Hill to 958 ft., and Aconbury Hill 905 ft., on the west Credenhill is 720 ft., while on the eastern side are Dinedor 595 ft., Backbury 738 ft., and Westhide 422 ft. whilst the middle of the district is low-lying.

The district is well watered. The river Wye flows across from west to east in a very tortuous bed, and the rivers Lugg and Frome flow from north to south until they empty into the Wye.

Geologically the district is Old Red Sandstone. Credenhill, Dinedor, Dinmore and Callow hills are of Cornstone formation, the subsoil is gravelly loam in those parishes through which the rivers flow, and in the remainder of the district for the most part marl or clay.

### Legislation in Force

Bye-laws with respect to Hop and Fruit Pickers made 1909 were amended during 1937; Tents and Vans made 1912 were amended during 1955; Food Bye-Laws were made in 1950; and Bye-Laws with respect to swimming baths and bathing pools during 1961, and Part IV of the Public Health Acts Amendment Act, 1890 has been adopted.

## PREVALENCE AND CONTROL OF INFECTIOUS AND OTHER DISEASES

### Food Poisoning Outbreaks

(a)	Total number of outbreaks ...	...	...	...	1
(b)	Number of cases ...	...	...	...	2
(c)	Number of deaths ...	...	...	...	0
(d)	Organisms or other agents responsible :—Salmonella Typhi-murium				
(d)	Foods involved :—Fish fried in batter suspected				

Although during the year 1972, 7 samples of milk have been submitted for examination for the presence of Brucella Abortus, all with negative results, the scheme for the eradication of this disease is welcome.

There seems little doubt that there is a general increase in the country of infection in cattle with Salmonellae—chiefly Salmonella Dublin and Salmonella Typhi Murium—and there have been a number of cases in this area during the year of infection on farms and it has been necessary to issue Heat Treatment Orders.

The desirability of legislation being introduced requiring all milk—whether intended for liquid consumption or for manufacture—to be efficiently heat treated cannot be stressed too strongly.

**Housing**

Attention has been directed to dealing with unfit houses and action with regard thereto has been as follows :—

(a) UNFIT HOUSES MADE FIT.					
1.	After informal action...	...	...	...	119
2.	After formal notice under :				
	(i) Public Health Act, 1936	...	...	...	0
	(ii) Housing Act, 1957	...	...	...	0
(b)	UNFIT HOUSES DEMOLISHED	...	...	...	5
(c)	UNFIT HOUSES CLOSED	...	...	...	0

The number of applications for Improvement Grants under the relevant provisions of the House Purchase and Housing Act, 1959 and Housing Acts, 1964 and 1969, were as follows:—

		<i>Discretionary</i>	<i>Standard</i>
Number of applications received	...	38	23
(a) Applications granted	...	33	23
(b) „ rejected	...	5	—
(c) „ pending	...	—	—

No improvement areas under the provisions of the Housing Act, 1964, have been prescribed by the Council but since the inception of this Act nine applications have been received from tenants for the improvement of houses outside such areas, and nine improvement notices have been served.

Two Qualification Certificates were issued during the year.

The number of new houses erected during the year are set out below :—

Houses built privately	...	...	...	...	153
Houses built by Council	...	...	...	...	0
				Total	153

Houses owned by the Council now number 808, and are situate in the following parishes: Allensmore (1), Birch, Much (50), Birch, Little (1), Breinton (8), Burghill (20), Clehonger (159), Credenhill (36), Dewchurch, Little (54), Dewchurch, Much (43),

Dormington (10), Eaton Bishop (30), Fownhope (97), Grafton (1), Hampton Bishop (1), Haywood (5), Holme Lacy (18), Holmer (2), Lugwardine (22), Marden (32), Mordiford (45), Moreton-on-Lugg (44), Pipe and Lyde (8), Preston Wynee (8), Stoke Edith (6), Stretton Sugwas (36), Sutton (14), Wellington (17), Weston Beggard (10) and Withington (30).

Following the erection at Fownhope of 23 bungalows and 8 flatlets for old persons, with Community Centre and Warden's Flat, the Council unanimously decided to name the Centre "Faulkner House", as a tribute to Councillor F. A. Faulkner who has been for many years the Chairman of the Housing Committee, and it was officially opened by the Lord Bishop of Hereford.

### Water Supplies

As from the 1st April, 1960, all publicly owned piped water supplies became vested in the Herefordshire Water Board and a mains supply has been afforded to houses in the parishes of Allensmore, Bartestree, Breinton, Burghill and Tillington, Lower Bullingham, Callow, Clehonger, Credenhill, Little and Much Dewchurch, Dewsall, Dinedor, Dormington, Eaton Bishop, Fownhope, Grafton, Hampton Bishop, Haywood, Holme Lacy, Holmer and Shelwick, Kenchester, Lugwardine, Marden, Mordiford, Pipe and Lyde, Preston Wynne, Stoke Edith, Stretton Sugwas, Sutton, Weston Beggard, Westhide and Withington and it is anticipated that houses in the parishes of Aconbury and Little and Much Birch will shortly benefit from a mains supply.

Apart from a few smaller units of supply all other sources of supply are subjected to filtration and chlorination and 56 samples were submitted for bacteriological examination, of which 49 were reported upon as being satisfactory and 7 as unsatisfactory. There is no evidence to believe that any of the supplies are liable to have plumbo-solvent action. Where adverse bacteriological reports are received information is immediately transmitted to the Board Engineer so that he can take appropriate remedial action.

The approximate number of dwelling houses supplied from public mains is 3,191.

In addition to the above mentioned samples, four samples have been submitted for Chemical Analysis and 28 for Bacteriological Examination from private sources with the following results:—

				<i>Satisfactory</i>	<i>Unsatisfactory</i>
Chemical	...	...	...	2	2
Bacteriological	...	...	...	12	16

### Dairies and Milk Supplies.

There are 24 distributors on the register who retail Designated Milk.

In addition there are a number of distributors registered in other areas who retail milk in this administrative district, together with a further number of persons, who are also producers and who are registered with the Ministry of Agriculture, Fisheries and Food.

### Food and Food Premises.

The number of known food premises in the Area is as follows —

General Food Shops...	...	...	...	...	56
Butchers' Shops	...	...	...	...	3
Food Preparation Premises	...	...	...	...	7
Bakehouses	...	...	...	...	1
Canteens	...	...	...	...	26
Licensed Premises	...	...	...	...	34
Catering Establishments	...	...	...	...	58

The above premises fulfil the requirements of Regulations 16 and 19 of the Food Hygiene (General) Regulations, 1960.

Fifty-nine premises are registered under Section 16 of the Food and Drugs Act, 1955, as follows:—

Storage and Sale of Ice Cream	...	...	...	57
Manufacture of Sausages	...	...	...	2

During the year inspections of food premises have continued to ascertain that hygienic practices were being maintained. Three hundred and twenty-nine inspections were carried out, of which seventy-nine related to registered premises.

Forty-one samples of Ice Cream were submitted for examination and were reported upon as falling within the following Provisional Grades :—

Provisional Grade I	...	...	40
„ Grade II	...	...	1
„ Grade III	...	...	—
„ Grade IV	...	...	—

There are no licensed slaughterhouses or egg pasteurising plants.

There is one poultry processing establishment, to which thirty-one visits were made during the year, 2,951 broilers, 1,864 chickens, and 498 turkeys were examined and 61 birds were condemned as being unfit for human consumption.

In addition a considerable quantity of food was found to be unfit for human consumption as a result of a refrigerator failure and was condemned.

All unfit food was destroyed by incineration.

### **Nuisances.**

No Abatement Notices were served during 1972—all nuisances being satisfactorily overcome by informal action.

### **Infectious Diseases**

Forty-seven cases of infectious diseases, consisting of 4 cases of Scarlet Fever, 39 cases of Dysentery, 2 cases of Food Poisoning and 2 cases of Infective Jaundice were investigated.

### **Eradication of Bed Bugs**

No infestations discovered.

### **National Assistance Acts, 1948 & 1951**

No action necessary.

### **Registered Common Lodging Houses**

None in the area.

### **Sewerage and Drainage**

The Council has continued to give earnest consideration to the provision of sewerage schemes and on its instructions the Consulting Engineers carried out a survey of the whole area and submitted a report defining those areas where schemes would be practicable. These proposals have been agreed in principle and consideration is now being given to the order of precedence in which the various schemes should be placed.

The scheme for part of Withington and the major portions of the parishes of Lugwardine and Bartrestree has been commenced and that for part of Burghill and further parts of Kenchester and Credenhill has been completed. Attention is also being given to proposed schemes at Moreton-on-Lugg, Wellington, Hampton Bishop, part of Mordiford, Holme Lacy and Dinedor and that for part of Holmer and a further part of Allensmore.

Consideration is also being given to the provision of a cesspit emptying service having regard to the fact that it will be impossible from economical and physical reasons to provide sewerage schemes for the whole of the Council's administrative area.

Sewerage schemes for the village of Fownhope, for King's Acre Road and certain other properties in the parish of Breinton, a portion of Kenchester and major areas of the parishes of Stretton Sugwas and Credenhill together with those for parts of the parishes of Allensmore and Clehonger and one for the centre of Little Dewchurch village have been completed.

**Factories**

There are 46 factories within the district, 44 with and 2 without mechanical power.

**1. Inspections :**

<b>Premises</b>	<i>Number of</i>

	32	5	113

Total Inspections ... .. 33

Accidents Notified ... .. 0

**Prevention of Damage by Pests Act.**

One Inspector/Operator, together with two operators are employed, but their services are shared jointly with the Bromyard, Ledbury and Ross and Whitchurch R.D.'s. The table set out hereunder records work in this area during 1972 :—

	<i>Non-Agric.</i>	<i>Agric.</i>	<i>Total</i>
Number of Inspections ... ..	234	624	858
Number of Infestations including Re-In- festations ... ..	176	578	754
Number of Treatments ... ..	176	578	754

Contracts held in the four areas at the 31st December, 1972, amounted to £4,520.

**Temporary and Moveable Dwellings**

Following approval by the County Planning Authority licences in accordance with the Model Standards have been issued under the provisions of the Caravan Sites and Control of Development Act, 1960, as follows :—

*Multiple sites :—*

Issued for a limited period ... 1  
Issued without time limit ... 6

*Individual sites :—*

Issued for a limited period ... 8  
Issued without time limit ... 6

In addition, there are several moveable dwellings in respect of which licences are not required under the provisions of the First Schedule of the Act, but which are, nevertheless, subject to the provisions of the Council's Byelaws, and a number of caravans are known to be stored at various premises but are unoccupied.

Considerable trouble is experienced in dealing with the nomadic type of caravan dweller who persists in siting his caravan on the verges of public highways and bridle roads.

### **Refuse Collection.**

Three freighters, with three loader-drivers and five loaders are employed and collections are carried out once in every week throughout the area including, under agreement with the County Council, the cleansing of and removal of refuse from various lay-bys. Part of the area is dealt with by a Contractor.

With these regular collections there is no excuse for the indiscriminate tipping of refuse in old quarries and on wasteland in the area but it must be stressed that it is not always local people who are responsible for this reprehensible practice.

During 1972, 1,300 loads of refuse were collected by the Council's freighter and hauled to the three disused quarries used for disposal.

The Council have inaugurated the paper sack method for the storage and collection of household refuse.

### **Scrap Metal Dealers.**

Twenty-three persons are now registered under the provisions of the Scrap Metal Dealers Act, 1964, as dealers in old metal, and close liaison in dealing with these persons is maintained with C.I.D. Officers of the West Mercia Constabulary.

Unfortunately many of these persons are nomadic in character and this creates additional difficulties in exercising the full control that is desirable.

**Petroleum Acts.**

The number of petroleum installations licensed by the Council is ninety-three.

During the year supervisory work together with the appropriate air pressure tests on tanks and pipelines was carried out at several new installations and at certain existing installations which were enlarged.

**Deposit of Toxic Waste**

The Deposit of Poisonous Waste Act became operative in March, 1972 and the Deposit of Poisonous Waste (Notification of Removal or Deposit) Regulations in the following August and this legislation resulted in the Local Authority obtaining for the first time a wide and comprehensive knowledge of all wastes being deposited within its area.

During the period August to December, 1972 inclusive a very considerable amount was disposed of in the district and a substantial amount of time is spent by members of the staff of the Public Health Department in the overall supervision of disposal of the waste involved and the keeping of the appropriate records.
